SAHIL NAWAZ

FORWARD DEPLOYED DEVELOPER

Location: Bihar, India | **Mobile:** +91 7323018308
Email: sahilnawaaz257@gmail.com
GitHub: github.com/sahilnawaz257 | **LinkedIn:** in/ali-sahil-nawaz-622b58213
LeetCode: leetcode.com/u/Alisahilnawaz

PROFESSIONAL SUMMARY

Forward Deployed Developer with a solid computer science foundation and full-stack software engineering proficiency. Experienced in bridging technical implementation with strategic product goals, building resilient web applications, integrating machine learning pipelines, and delivering customer-centric digital solutions. Founder of Gymsewa (powered by Bytewave Innovation), with a hands-on track record in system architecture, algorithmic problem-solving, and production operations.

TECHNICAL & BUSINESS COMPETENCIES

Programming Languages:	Python, C, C++, SQL
Frontend Engineering:	HTML5, CSS3, JavaScript (ES6+), React JS, Responsive UI/UX
Data & Machine Learning:	NumPy, Pandas, Data Analysis, Artificial Intelligence, YOLOv8, LangChain (RAG)
Databases & Developer Tools:	PostgreSQL (Supabase), SQLite, Git, GitHub, RESTful APIs, Flask
Core Professional Areas:	Forward Deployed Development, Product Development, Business Strategy, Solution Delivery

PROFESSIONAL EXPERIENCE

Founder & Product Strategist — Gymsewa | *Powered by Bytewave Innovation* *2024 – Present*

- Spearheaded end-to-end digital product planning, technical architecture, and platform roadmap for fitness enterprise management.
- Directed operational workflows, customer-facing technical design, and service automation under Bytewave Innovation.
- Formulated business development and user onboarding strategies to ensure long-term platform scalability and operational resilience.

SELECTED ENGINEERING PROJECTS

Crowd Density Counting System | *Python, Computer Vision, YOLOv8* *AI & Vision*

- Built an automated computer vision pipeline leveraging YOLOv8 object detection to calculate real-time crowd density and occupancy metrics.
- Designed spatial heatmapping visualizers and automated threshold triggers for venue capacity monitoring and crowd safety management.

Library Management Software | *Python, SQL, Relational Architecture* *Database Systems*

- Engineered a relational inventory management system with robust ACID transaction support for book circulation and catalog management.
- Developed membership tracking, due-date calculation routines, fine-accrual algorithms, and SQL query optimizations.

Brand Guideline Audit Tool | *Frontend Engineering, Asset Verification* *Design Systems*

- Created an automated compliance tool verifying digital design assets against official typography, hex palettes, and layout hierarchies.
- Streamlined developer-designer collaboration by highlighting styling discrepancies and generating actionable compliance audit summaries.

EDUCATION & ACADEMIC BACKGROUND

JB Group of Institutions of Technology | B.Tech in Computer Science and Engineering *2025 – 2029*

- Location: Dehradun, Uttarakhand, India | Focus: Data Structures, Algorithmic Analysis, and System Architecture

The Open University | Data Analyst Online, Computer Science *June 2026 – July 2029*

- Focus: Artificial Intelligence, Retrieval-Augmented Generation (RAG), and LangChain Frameworks
